## PROFILE

Enthusiastic software developer with 10 months of experience, specializing in frontend development with React.js and React Native technologies. Engaged in three pivotal projects: IT asset management system (React.js), property management mobile app (React Native), and ongoing digital card mobile app (React Native). Proven track record of collaboration and problem-solving in fast-paced team environments and efficiency in software development.

## WORK EXPERIENCE

### Software Developer

Cylsys Software Solution Pvt. Ltd

## PROJECTS

### IT -Asset Management

July 2023 - August 2023

- As a pivotal team member in the development of an IT Asset Management System, I contributed to building a robust and scalable solution.
- My role involved designing and implementing APIs using Ruby on Rails for the backend, ensuring seamless communication with the React.js frontend
- The system effectively tracked and managed IT assets, providing a centralized platform for inventory management.
- Through collaborative efforts, we successfully delivered a comprehensive solution, streamlining IT asset tracking processes and enhancing overall organizational efficiency.

### KODIE

SEP 2023 - Present

- I customized the application to cater to four different user roles, ensuring each user had a unique experience.
- I created user-friendly interfaces and features specifically for managing properties. I made sure the application worked well on various mobile devices.
- I listened to user feedback and made improvements based on it.

### Digital Visiting Card

Jan 2024 - Present

- Designed and built an intuitive dashboard for easy access and management of user information.
- Implemented a convenient QR code sharing feature, enabling swift exchange of contact details.
- Collaborated effectively with team members to ensure project goals were met and delivered a top-notch user experience.
